SaaS Guide Solutions Consulting Services

Enterprise Sales & Marketing Strategy | SaaS Growth | Global Revenue Leadership

Overview

SaaS Guide Solutions partners with technology companies to accelerate revenue growth, scale global sales operations, and strengthen go-to-market execution. With over two decades of experience leading enterprise sales across SaaS, ERP, cybersecurity, and industrial technology sectors, SaaS Guide Solutions provides strategic and operational expertise to help organizations achieve success.

Core Services

1. Enterprise Sales Strategy & Execution

- Development of end-to-end enterprise sales strategies for SaaS/tech companies
- Optimization of sales frameworks to improve conversion, forecasting accuracy, & revenue performance.
- Guidance through ARR milestones, market expansion, and acquisition or takeover readiness.
- Development of an Interactive Sales & Marketing Playbook.

2. Sales Leadership & Organizational Development

- Fractional or interim VP/Director of Sales services to design, build, & mentor high-performance teams.
- Leadership development and sales enablement programs focused on global scalability.
- Recruitment, onboarding, and coaching frameworks for SDR, AE, and channel sales teams.

3. SaaS Go-to-Market & Revenue Acceleration

- Market entry strategy, product marketing & positioning, and pricing optimization.
- Development of sales playbooks and GTM execution plans for emerging SaaS products.
- Roadmap analysis and QA of existing or dev products.

4. Lead Generation

- Review and benchmark existing lead generation strategies (PPC, outbound rep activities, referral).
- Recommend AI-integrated tools to reduce lead time and increase volume.
- Competitive analysis of positioning and activity.
- Outbound email campaigns to targeted lists.
- Recommendations based on recent activities and success rates.
- Review SEO performance and rankings and make web edits (requires site admin access).
- Automated AI blogging with keyword matrices.

5. CRM & Revenue Operations Optimization

- Salesforce and HubSpot audit, implementation, & AI optimization for improved visibility & performance.
- Revenue ops process audits, forecasting frameworks, and buyer budget analysis.
- Workflow automation to drive sales efficiency and data accuracy.

6. Technical and Product Lifecycle Alignment

- Strategic alignment between sales, product, and technical teams to ensure market readiness.
- Advisory on SaaS & AI platform transitions, integration strategies, and product-market fit.
- Credible technical background in programming and product development to support technical sales cycles.

7. Channel & Partner Ecosystem Development

- Creation and management of global channel, partner, and reseller programs.
- Identification and negotiation of strategic alliances to drive new market access.
- Design of co-selling and joint go-to-market initiatives with SaaS and technology partners.
- AI contract management and development
